TYLÖ INFRA
INFRA CABIN PRIME

Tylö infra cabin Prime

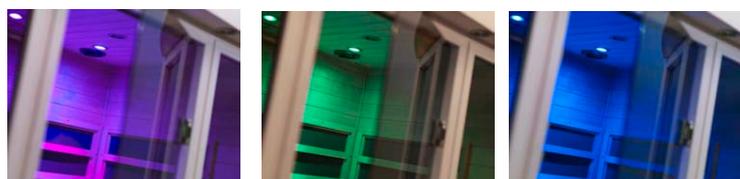

Easy accessible warmth and comfort.

Sit down in one of Tylö's infra cabins and let the refreshing warmth embrace you. Allow yourself to have some time on your own, listen to music from the built-in stereo equipment or read a magazine while you relax and enjoy the moment.

Through the built-in infra panels the Tylö infra cabin Prime provides refreshing long-wave heat. The infrared heat gives a pleasant feeling of relaxation and is the same kind of heat the sun provides us with. The infrared heat itself is generated by the CarbonFlex™ heating panels and due to the huge surface area of these heating panels the heat is evenly distributed and the surface temperature of the heaters is comfortable to the bathers. The CarbonFlex™ heating panels contains well-proven technique which provides both reliability and safety.

The infra cabins come in six different models suitable for 1 person up to 4 persons. Four of the models have a front entrance and two of the models have a corner entrance. The simple assembly procedure where the wall sections are secured with the snap-in closure makes the Tylö infra cabin Prime easy to assemble.

Tylö infra cabin Prime is equipped with colour therapy which is easily controlled by the control panel. Choose the light colour you are in the mood for, or choose rotating colours for added relaxation and serenity. Each sauna also includes integral mini-spotlights in the interior ceiling and on the exterior ceiling overhang.

Features that make the difference.

- **CarbonFlex™ heating panels.** Heating panels with large surface area providing soft heat evenly distributed from all sides (no hot or cold spots). Infra panels in bench, wall- and floor sections.
- **Scandinavian design.** A sober Scandinavian design in combination with wall sections in Canadian hemlock. All infra cabins have white exterior paint.
- **Easy to assemble.** Fast assembly with no tools. Wall panels mounted onto an easy-fit base and topped with easy-fit ceiling panel. To be safely plugged into standard household electric socket.
- **Freedom of choice.** The Tylö infra cabin Prime comes in 6 different models, suitable for the smaller space as well as the more generous one. Models with both corner- and front entrance.
